

# ART LESSON H: MAKE A SCULPTURE USING SHAPES

Learning target: I can select materials to create models and forms

You will need:

Look at these sculptures by the Spanish artist, MIRO:

- Make a sculpture using any type of card. A cardboard tube can be good to use as the base.
- Cut slits in the card to join the shapes together (photo 1). Make sure it can stand up!
- Do you want to paint or colour it with bright colours like MIRO uses? Take it apart to paint it then put it back together when it's dry.
- Send a photo to school.
